

Don't just see it.  
**Be it.**

From the company that pioneered big screen entertainment comes the next chapter in home theater entertainment—3D projection. The HC9000D is Mitsubishi's best 2D projector that's also its first 3D projector for home theater. The Mitsubishi HC9000D has everything you want in a 2D projector, but raises the bar with 3D in full 1080P, a brilliant color palette, and Reon VX video processing. It produces a picture so life-like, you won't just see the movie—you'll be part of the movie.

Visit our website or scan the code below to see why projectorcentral.com bestowed the HC9000D with its 'Highly Rated' designation.

3D glasses & IR emitter required  
for 3D viewing (sold separately)
